**Five generations of
honey and turrón**

Award winning honey and turrón

In the village of Os de Balaguer in the heart of Catalonia, Torrons i Mel Alemany has created a universe of sweetness. For five generations, the Alemany family has selected honey from only the best beekeepers and prepared artisanal turrón.

The history of Torrons i Mel Alemany dates back to the end of the 19th century when Mrs Mundeta made sweets with honey and nuts from the area. Given that the region was harsh and difficult to cultivate, this activity was a good alternative.

Alemany specialises in monoflower honey which it collects from beekeepers throughout the country. Alemany is always innovating, creating the concept of honey with added value with its gourmet honey line.

Alemany turrón is made through a slow cooking process with local nuts and carefully selected rosemary honey, that help give it its special flavor.

We have developed a full range of products made with honey, including nuts, condiments, candies, chocolates, etc.

Alemany's honeys and turróns have been recognised by the Great Taste Awards on many occasions, these awards from the United Kingdom are amongst the most recognized food and drinks awards in the world.

**Our honey,
the natural sweetener**

Honey is an ancestral source of sweetness. Bees make honey from the nectar of flowers, which contains vitamins, minerals and amino acids, and that is why it is considered a natural sweetener.

Thanks to the experience and professionalism of our trusted beekeepers, we collect and select the best honeys from our land.

Honey candies

In the late 19th century Mrs Mundeta made sweets with
honey and nuts from the area as it was harsh and difficult to cultivate.
Almost two centuries later, we still have this sweet candy.
