

Land, where everything comes from.

The essence. A rocky, dry and poor in organic matter soil with an average production of about 3500 Kg / Ha.

The cellar, fully powered by solar energy.

Fully integrated in the landscape. We have a photovoltaic park with 110 solar panels and 48 batteries of 2500 Ah.

High-altitude vineyards.

All the vineyards are organic and located in the municipality of La Pobla de Cérvoles. A high altitude area, with influences from the Mediterranean Sea and bordering with the Priorat region, at more than 700 metres above the sea level, with low rainfall, high thermal variation between day and night and high heat insulation

The Artists' Vineyard.

An unique and innovative initiative that fully integrates wine into an artistic universe with an open-air exhibition hall in the middle of the vineyards, where magnificent sculptures witness the growth of the vines

ART AND WINE.
Guinovart, a Catalan painter of international recognition, was a lover of art and wine. He contributed to the winery's design and created an impressive 10.5 metre-long painting, a tribute to the land that presides over our tasting room. He was also the idea of The Artists' Vineyard

Ecological wines with personality.

Each bottle is a small art creation. All our wines are certified organic since 2015

Always in movement

We use our own indigenous yeasts, recover traditional local varieties such as Trobat & our wines are aged in amphorae, cement eggs, granite eggs, oak barrels and stainless steel tanks

Our Organic Extra Virgin Olive Oil.

Cold pressed, unfiltered and organic extra virgin olive oil

Aging 6 months in concrete and granite eggs

Partial fermentation with the skins.

An intense and surprising wine

TROBALLA ARRELS

100% Grenache

Mas Blanc vineyard at 800 m. above sea level

A tribute to the wine that our grandparents made

No added sulfites

'ops

A name that speaks of the soil and that means "maturity, perfection, and optimal humidity" in the local Catalan language.

We make our wine from grapes from our own ecological plantations, harvested solely by hand at their optimal moment of ripeness. This is how we have always done it, from belief and because we can't see any reason to do it differently.
